

Variable Height Welding Bench

Tecmach variable height welding benches are built to meet the needs of precision fabricators who require a robust high quality equipment to support their manufacturing operation. The welding operative can change the height of the table to give best access for each part of the operation, this can assist in maintaining work quality and improve operator health and safety

Benefits of a variable height welding bench

- Heavy duty top allows for tacking to table and grinding of tacks
- Plate thick enough not enough to distort
- Safer manual handling—loading, unloading and while welding
- Improved ergonomics
- Improved efficiency

Picture shows welding bench with long platform to fit customer specific requirements. This table is based on a tandem scissor table because of the length. Platform 3000 x 1050 mm and 500 kg capacity

Variable Height Welding Bench Features

Tecmach variable height welding benches are based on their proven scissor lift range which are built of quality components for industrial usage. The tables are built to EN 1570, machinery directive and are CE marked.

- Platform 10 mm steel plate as standard
- Platform is unpainted
- Earthing bonding points
- Flexible conduit over cable and hose to protect from welding and grinding sparks
- Industrial build quality
- Very good stability
- Safety ledge aground platform & hose break valve in cylinders
- Hand pendant control or foot control—UP, DOWN and emergency stop

Standard Bench Specification

JX1-7/1250-2C W Single scissor variable height welding bench

Capacity : 700 kg

Platform: 2000 x 1000 mm

Closed height: 240 mm

Stroke: 1250 mm

Max Raised height: 1490 mm

Electro Hydraulic Power pack—remote 0.75 kW motor, 3 phase, 415 V, 50 Hz

Control Voltage: 24 V AC

Hand Pendant

We can **customise** your welding bench to specific requirements e.g. platform size
