Tecmach, a leading manufacturer of scissor lifts, offers a mast lift for carrying of goods between levels, up to a floor to floor height of 5.5 metres.

The lift is designed and manufactured using high quality well engineered components. Direct acting hydraulically actuated telescopic lift cylinders are used to provide a safe, smooth operating, auto-self levelling system.

The lift is freestanding and of a self supporting design and does not have to be pit mounted. The closed height of the platform is only 65 mm and accessed by a ramp

The Lift is easily and quickly assembled on site and can be delivered in one or more parts for easy access on site.

Design features

- Up to 1500 kg capacity.
- Lift stroke up to 5500 mm.
- Closed height 65 mm.
- No pit required.
- Very low noise level.
- Standard lift shaft on ground level.
- Many accessories available.
- Custom design available
- Extremely easy to install at site.
- Freestanding allowing repositioning.
- Can be placed in existing shaft.
- Easy and safely maintained.

All modelling are designed in house, providing exceptional opportunities for advanced customisation

Tecmach mast lifts are manufactured according to current standards for slow speed Lifts/elevators
